SCVUSD may, by written notice to the Contractor, immediately terminate this Contract if SCVUSD determines that the Contractor has been debarred, suspended or otherwise lawfully prohibited from participating in any public procurement activity, including but not limited to, being disapproved as a Subcontractor of any public procurement unit or other governmental body.

Termination for Convenience. SCVUSD reserves the right to terminate the Contract, in whole or in part at any time, when in the best interests of the SCVUSD without penalty recourse. Upon receipt of the written notice, the Contractor shall immediately stop all work, as directed in the notice, notify all Subcontractors of the effective date of the termination and minimize all further costs to SCVUSD. In the event of termination under this paragraph, all documents, data and reports prepared by the Contractor under the Contract shall become the property of and be delivered to SCVUSD. The Contractor shall be entitled to receive just and equitable compensation for work in progress, work completed, and materials accepted before the effective date of the termination. Project completion is contingent upon E-Rate reimbursement. The cost principles and procedures provided in A.A.C. R7-2-1125 shall apply.

Termination for Default. In addition to the rights reserved in the Terms and Conditions of this Contract, SCVUSD reserves the right to terminate the Contract in whole or in part due to the failure of the Contractor to comply with any term or condition of the Contract, to acquire and maintain all required insurance policies, bonds, licenses and permits, or to make satisfactory progress in performing the Contract. The Procurement Officer shall provide written notice of the termination and the reasons for it to the Contractor.

Upon termination under this paragraph, all documents, data and reports prepared by the Contractor under the Contract shall become the property of and be delivered to SCVUSD.

SCVUSD may, upon termination of this Contract, procure, on terms and in the manner that it deems appropriate, materials and services to replace those under this Contract. The Contractor shall be liable to SCVUSD for any excess costs incurred by SCVUSD reproducing the materials or services.

If the breach is by a subcontractor, and the subcontract is suspended or terminated as a result, Contractor shall be required to take such steps as may be necessary to either self-perform the services that would have been provided under the subcontract or retain a replacement subcontractor as soon as possible so as not to delay project completion.

### **Scope of Work**

Please include all fees, including Monthly Re-occurring Costs, Non Re-occurring Costs, including Installation, and applicable taxes.

FCC rules require that an applicant sign a contract with the service provider before signing and submitting a completed Services Ordered and Certification Form (Form 471). **Consequently, all Contracts, Statements, of Work, and/or Service Agreements should be submitted with this response with a handwritten signature and date. Failure to provide signed documents may disqualify your response for services sought.** Countersigned documents may be provided after the Funding Commitment Decision Letters are issued by the Schools and Libraries Division of the Universal Services Administrative Company.

Responses shall include the Service Provider Authorized Response (“SPAR”). The SPAR serves as a contract and proof of timely response. Additional agreements may be included and executed for service delivery. For E-rate filing purposes the SPAR may be used. All additional agreement(s) should be authorized prior to submission for applicant review.

Service providers should propose an implementation plan with a seamless transition for the delivery of service. The service delivery plan should be designed to mitigate the risk of downtime and assure continued uptime during business hours. Work that requires the interruption of the current service shall be performed after hours and/or at a time that is agreeable to SCVUSD. All proposed solutions shall be fully tested to assure the service expectations defined within this document. If a new service provider is selected and their services deployed, it is expected to run alongside the current solution and in conjunction with SCVUSD expectations for at least 10 days prior to replacing the existing service. Service Level Agreements are expected.

The mention of any manufacturer, make, or equipment model specifications provided are meant to provide an example or sense of configuration and similar and/or equivalent equipment is acceptable and shall be considered. All provided equipment references and equipment lists are simply proposed to give service providers a better understanding of the project requirements. The applicant seeks a solution that is compatible with the existing network infrastructure. The proposed solution must provide functionality similar to the functionality of the equipment referenced or listed. All components, connectors, couplers, jacks, panels, raceways, conduit, faceplates, wire managers, and patch cables necessary to transport information, cables to interconnect components, modules, licenses, and cable system costs must be provided in the response.

### **Category One**

The first category of supported services, Category One, includes the services needed to support broadband connectivity to schools and libraries. Eligible Category One services are listed in the entries for data transmission services and Internet access and voice services. This category consists of the services that provide broadband to eligible locations including data links that connect multiple points, services used to connect eligible locations to the Internet, and services that provide basic conduit access to the Internet. With the exception of leased dark fiber and self-provisioned broadband networks, maintenance and technical support appropriate to maintain reliable operation are only eligible for support when provided as a component of these services. Voice services, as described below, are subject to a phase down of support that began in Funding Year (FY) 2015.

### **Internet Access Note**

Eligible Internet access may include features such as basic firewall protection, domain name service, and dynamic host configuration when these features are provided as a standard component of a vendor's Internet access service. Firewall protection that is provided by a vendor other than the Internet access provider or priced out separately will be considered a Category Two internal connections component. Examples of items that are ineligible components of Internet access include applications, content, e-mail, and end-user devices and equipment such as computers, laptops, and tablets.

### **Wireless Services and Wireless Internet Access Services Note**

As clarified in the *Second E-rate Modernization Order*, data plans and air cards for mobile devices are eligible only in instances when the school or library seeking support demonstrates that the individual data plans are the most cost-effective option for providing internal broadband access for mobile devices at schools and libraries. Applicants should compare the cost of data plans or air cards for mobile devices to the total cost of all components necessary to deliver connectivity to the end user device, including the cost of Internet access and data transmission service to the school or library. Seeking support for data plans or air cards for mobile devices for use in a school or library with an existing broadband connection and wireless local area network implicates the E-rate program's prohibition on requests for duplicative services. Off-campus use, even if used for an educational purpose, is ineligible for support and must be cost allocated out of any funding request. Managed internal broadband services, such as managed Wi-Fi, are eligible only for Category Two support.

### **Connections Between Buildings of a Single School**

The classification of connections between multiple buildings of a single school is determined by whether the buildings are located on the same campus. A "campus" is defined as the geographically contiguous grounds where the instructional buildings of a single eligible school are located. A single school may have multiple campuses if it has instructional buildings located on grounds that are not geographically contiguous. Different schools located on the same grounds do not comprise a single campus. The portion of the grounds occupied by the instructional buildings for each school is a campus for that school.

Please note, connections between

- Buildings on different campuses of a single school are considered to be Category One digital transmission services.
- Different schools with campuses located on the same property (e.g., an elementary school and middle school located on the same property) are considered to be Category One digital transmission services.
- Buildings of a single school on the same campus are considered to be Category Two internal connections.

### **Fiber Builds and Construction Cost Questions**

Proposals that contain fiber builds or have significant construction costs must provide answer the following questions. Failure to include the answer to these questions may result in the disqualification of the response. For each Fiber Run, please include:

1. Total number of route feet:
2. Total Cost of Fiber Build:
3. The average cost of the Fiber Material per foot? (e.g. cost of the actual fiber cables):
4. The average cost of the Fiber Placement per foot? (e.g. cost of the placement of the actual fiber cables into the ground):
5. The average cost of the Structure Material per foot? (e.g. cost of conduit, splicing, make ready pole attachment, etc.):
6. The average cost of the Structure Placement per foot? (e.g. cost of conduit, splicing, make ready pole attachment, etc.):
