VoIP implementation details

Casa Grande Union High School District seeks proposals from Service Providers to install and provide the following services: **VOICE OVER IP SERVICES AS A USAC/SLD PRIORITY 1 SERVICE** to all of Casa Grande Union High School District school campuses, including the District's Office. Terms will be dictated by E-Rate funding cycles stating allowable contract dates and contract termination dates. This contract may cover both E-Rate eligible and non-eligible items. If eligible and non-eligible items or services are bid, bidders must break out the non-eligible items and list them as such. **Only Eligible Telecommunications Providers will be considered.**

Scope of Work:

Casa Grande Union High School District is seeking a vendor(s) to provide Voice over IP phone service. The District may award to this service to more than one vendor if in the District's best interest. The scope of work will include a phased implementation plan starting with the installation of new services at the Vista Grande High School, and the migration of existing services to Voice over IP at the District Office/Casa Verde/Desert Winds campus and Casa Grande Union High School Campus

An exact scope of work listing all pertinent details, including but not limited to, installation schedules, exact standards to be adhered to, as well as detailed drawings showing cable and equipment locations will be provided to District by the vendor.

Project Overview:

The Vista Grande site is a new facility scheduled to open for the 2009-2010 school year. This site will be the first phase with anticipated installation availability of late June 2009.

The secondary phase(s) will be the migration of the two existing sites. These sites presently use a Toshiba PBX telephone system utilizing a fractional T1 for connectivity between sites.

We plan to develop a unified district-wide system with service in all office spaces and all classrooms. Such a system must include emergency failovers at each site, accurate E-911 information, provisions for using analog devices like faxes, and a cost effective transition from the current system. All premises equipment will be owned and maintained by the vendor but district personnel will have the ability to handle routine moves, adds, and changes.

It is important that each school site keep its existing primary telephone number and have outgoing caller identification.

PROPOSALS NOT INCLUDING A DEMONSTRATION BY THE VENDOR THAT THE PROPOSED SERVICE IS ELIGIBLE FOR FUNDING UNDER ERATE PRIORITY ONE WILL NOT BE

CONSIDERED**Site Details:****Phase 1****Vista Grande High School**

1556 N. Arizola Road
Casa Grande, Arizona 85222
