Type of Installation: New Equipment

Installation Timeframe: No sooner than July 1, 2013

Installation and Configuration Options Required: Yes

Type of Procurement: Purchase - final approval may be based upon receipt of a positive Funding Commitment Decision Letter and, or the governing board's approval.

All provided equipment lists are simply proposed to give service providers a better understanding of the project requirements. SCVUSD seeks a solution that is compatible with the existing network infrastructure. The proposed solution must provide functionality similar to the functionality of the equipment in provided equipment list. All components, connectors, couplers, jacks, panels, raceways, conduit, faceplates, wire managers, and patch cables necessary to transport information, cables to interconnect components, modules, licenses, and cable system costs must be provided in the response.

FCC rules require that an applicant sign a contract with the service provider before signing and submitting a completed *Services Ordered and Certification Form* (Form 471).

Consequently, all Contracts, Statements, of Work, and/or Service Agreements must be submitted with this response with a handwritten signature and date. Countersigned documents may be provided after the Funding Commitment Decision Letters are issued by the Schools and Libraries Division of the Universal Services Administrative Company.

125 Wireless Access Points (WAP) and associated licensing:

WAP devices shall be a/g/n compatible and must be compatible with existing network infrastructure / design (see Basic Maintenance Request below for current equipment deployed)

The district already has some WAPs, see inventory below, and would like to have a WAP in each classroom.

Cabling to support WAPs:

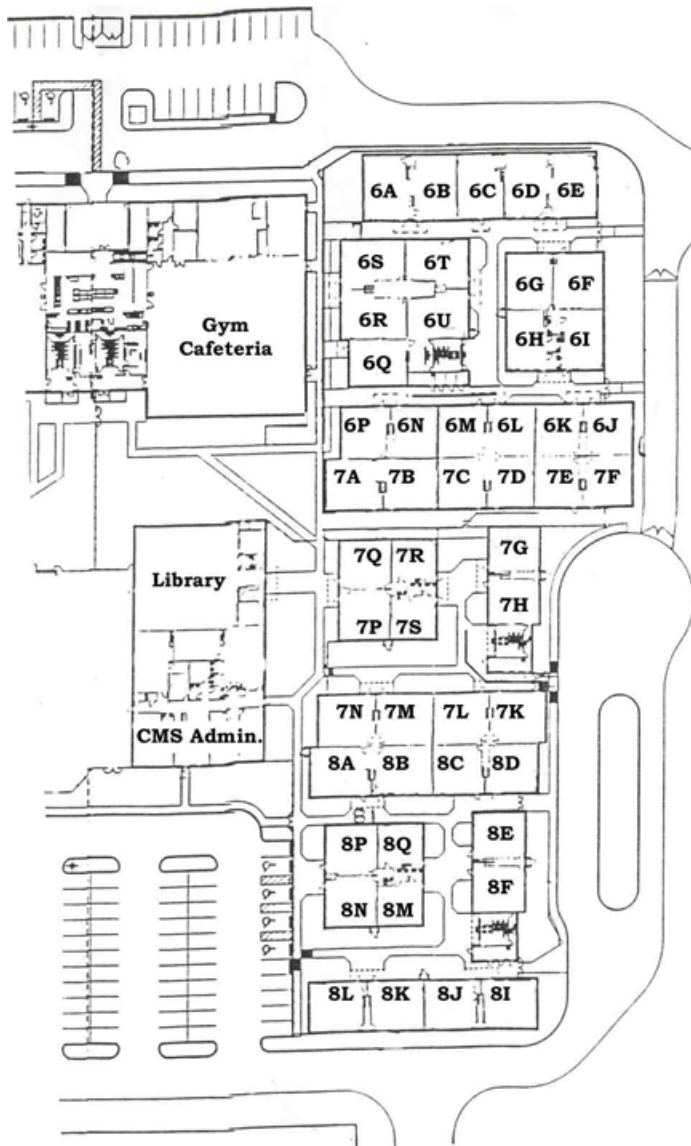

Provide pricing to include installation, termination activation, and initial configuration of all cabling (pricing should be based on the minimum quantity purchased – volume discounts may be included): for up to 125 drops of varying length (30, 75 foot; 65, 150 foot; and 30, 200 foot drops).

The ceilings are standard acoustical drop ceiling and all ceiling space is assumed to be a plenum environment. It is preferred that all data cabling be plenum rated, unshielded Cat6.

Priority 2 Internal Connections – Basic Maintenance

Internal Connections are components located at SCVUSD’s site that are necessary to transport information to classrooms and to eligible administrative areas or buildings. Internal Connections include connections within, between or among instructional buildings that comprise a school campus, but do not include services that extend beyond the school campus. Components at SCVUSD’s site are eligible only if they are an essential element in the transmission of information within the school. The components must be necessary to transport information all the way to individual classrooms. Internal Connections do not include services that extend across a public right of-way beyond the school.

Basic maintenance services are defined as follows: “but for the maintenance at issue, the connection would not function and serve its intended purpose with the degree of reliability ordinarily provided in the marketplace to entities receiving such services without E-rate discounts.” Please provide a Basic Maintenance Contract to perform the following tasks on the equipment listed below:

1. Repair and upkeep of eligible hardware
2. Wire and cable maintenance
3. Basic technical support
4. Configuration changes

Bidder’s Basic Maintenance Agreement must contain the Location, Product, and Make / Model number of the equipment to be covered by the proposed Basic Maintenance Contract (note the table below). This table (or a similar table with like data) must be included in with the Bidder’s Basic Maintenance Agreement:

Location Deployed	Product / Service to be Covered	Make/Model Number

Note: The above worksheet is available for downloaded – please visit: http://adsadsi.com/rfp_year_16.shtml.

In the FCC’s *Sixth Report and Order* (FCC 10-175), the FCC included the following information on unbundled warranties and Basic Maintenance of Internal Connections (“BMIC”):

- We find that an unbundled warranty is an ineligible BMIC service because it is purchased as a type of retainer and not as an actual maintenance service. That is, BMIC contracts that require an upfront payment and that payment is required regardless of whether any service is actually performed are not eligible.
- ...if applicants are able to estimate a certain number of hours per year for maintenance, based on the current life of their equipment and a history of needed repairs and upkeep, they may seek E-rate funds for upfront costs on service contracts designed to cover this estimate of repairs and upkeep. Reimbursements will be paid on the actual work performed and hours used only. For example, if a school determines it will need 30 service hours in a given year to maintain its internal connections but uses only 20 hours, the school will be reimbursed only for 20 hours even if they were approved for E-rate funds on 30 hours.

The *Sixth Report and Order* deems unbundled warranties ineligible for support beginning with Funding Year 2011. Applicants cannot simply cost-allocate out the ineligible portion because the Commission’s rules do not allow applicants to receive support for services in a basic maintenance contract that contains both eligible and ineligible services. See paragraph 24 of the *Third Report and Order*, CC Docket No. 02-6, FCC 03-323 (2003).

Software downloads, bug fixes, and access to a technical assistance center may be eligible.

For additional information on the changes to the eligibility of basic maintenance contracts and other changes to the E-rate program you can refer to the following documents:

- *Sixth Report and Order* (FCC 10-175)

- Order DA 10-2355, clarifying the eligibility of basic maintenance and the new E-rate gift rules adopted in the Sixth Report and Order
- Public Notice DA 10-2356, providing further guidance to E-rate participants, listing effective dates of the proposals adopted in the Sixth Report and Order, and answering Frequently Asked Questions (FAQs).
- *Third Report and Order* (FCC 03-323)

Please make sure any required Contracts or Statements of Work are authorized and included in your response.

Maintenance Logs are required to be kept by the service provider and sent to school quarterly (please include a sample log).

Please note: The following products and services **are NOT eligible (Equipment not eligible for E-Rate reimbursement shall not be covered under this agreement):**

1. On-site technical support (*i.e.*, contractor duty station at the applicant site) when off-site technical support can provide basic maintenance on an as-needed basis.
2. Services such as network management and 24-hour network monitoring.
3. Help desks that provide a comprehensive level of support beyond basic maintenance of only eligible components.
4. Technical support contracts that are more than basic maintenance.
5. End User Equipment (PCs and Phones).

Eligible basic maintenance does not include services to maintain ineligible equipment, to enhance the utility of equipment beyond the transport of information, or to provide diagnostic services in excess of those necessary to maintain the equipment's ability to transport information.
