Eligibility Limitations for Managed Internal Broadband Services

The equipment eligible for support as part of a managed internal broadband service may include only equipment listed as a broadband internal connections component above. Upfront charges that are part of a managed service contract are eligible for E-rate support except to the extent that the upfront charges are for any ineligible internal connections components (e.g., servers other than those that are necessary to provide caching) which, if included in the contract, must be cost allocated out of any funding request.

Please identify all known ineligible Components of Managed Internal Broadband Services. Failure to do so may result in disqualification.

Scope of Work

Please include all fees, including Monthly Re-occurring Costs, Non Re-occurring Costs, including Installation, and applicable taxes.

FCC rules require that an applicant sign a contract with the service provider before signing and submitting a completed Services Ordered and Certification Form (Form 471). Consequently, all Contracts, Statements, of Work, and/or Service Agreements must be submitted with this response with a handwritten signature and date. Countersigned documents may be provided after the Funding Commitment Decision Letters are issued by the Schools and Libraries Division of the Universal Services Administrative Company.

Responses shall include the Service Provider Authorized Response (“SPAR”). The SPAR serves as a contract and proof of timely response. Additional agreements may be included and executed for service delivery, but for E-rate filing purposes the SPAR may be used. All additional agreement(s) shall be authorized prior to submission for applicant review.

Service providers should propose an implementation plan with a seamless transition for the delivery of service. The service delivery plan should be designed to mitigate the risk of downtime and assure continued uptime during business hours. Work that requires the interruption of the current service shall be performed after hours and/or at a time that is agreeable to IOA. All proposed solutions shall be fully tested to assure the service expectations defined within this document. If a new service provider is selected and their services deployed, it is expected to run alongside the current solution and in conjunction with IOA expectations for at least 10 days prior to replacing the existing service. Service Level Agreements are expected.

Please note that fees and charges that are a necessary component of an eligible product or service are generally eligible, including: change fees, freight assurance fees and shipping charges. The following fees and charges are eligible only if a contract with a vendor for eligible product or services specifically provides for these costs: per diem and travel time.

The mention of any manufacturer, make, or equipment model specifications provided are meant to provide an example or sense of configuration and similar and/or equivalent equipment is acceptable and shall be considered. All provided equipment references and equipment lists are simply proposed to give service providers a better understanding of the project requirements. The applicant seeks a solution that is compatible with the existing network infrastructure. The proposed solution must provide functionality similar to the functionality of the equipment referenced or listed. All components, connectors, couplers, jacks, panels, raceways, conduit, faceplates, wire managers, and patch cables necessary to transport information, cables to interconnect components, modules, licenses, and cable system costs must be provided in the response.

Please include Shipping, Project Management, Engineering, Installation, Activation, Configuration and/or Documentation Costs.

Please include Training for System Operation and Maintenance at time of installation or at a time that may be mutually agreed upon.

Please include a reasonable Contingency Fee if it is a regular business practice. This fee will be reimbursed only if work is performed.
